

**WORKSHOP RMWF****23.3. 2018 - HUNGARY**

The Department of Materials Engineering and Materials Technology, which carries out the international welding engineering training course, organised a professional day on the management of welding risks on March 23, under the RMWF project. Title of the project with the support of the Erasmus + program: Introduction of international curriculum guidelines for the management of the risks arising from the manufacture of welded structures. The project aims to develop a new course and related curricula in accordance with the revised curriculum guidelines of the European Welding Association (EWF) as well as training specialists for risk management of welded structures. A European consortium organises the fundamentally international curriculum and curriculum development project, under the leadership of the Timesharing Welding Institute (ISIM), the European Welding Association (EWF), the University of Miskolc and a Norwegian Small Business (QMS) for Quality Assurance and a Hungarian Engineering Office TVE Kft.).

The workshop aimed to promote the risk-based approach and, on the other hand, to attract the attention of relevant stakeholders, including industrialists, about the need for planned training and the opportunities offered by the project.

Figure 1 - WORKSHOP RMWF

Prof. Dr János Lukács opened the event, project manager, followed by László Tóth, Prof. Dr László Tóth "Our Life and Risk-Based Perspective". Subsequently, the RMWF project was presented, after which the Norwegian partner presented the results of the industrial expectations survey with the participants. In the second part of the event, the participating industrialists and students interested in welding

have received comprehensive information on the curricula prepared along the new EWF guidelines. The workshop was concluded with a roundtable discussion where the reputable representatives of the profession and the participants could give meaningful feedback on the curriculum and its content to project implementers.

The Miskolc University will host the project events several times this year. In May, the Institute hosts a brief meeting of the project management and in September a pilot course.
